Introduction

When feeds exposed to water, they fall apart and deteriorate, then not only costly ingredients were wasted, but the feed residue pollutes pond bottoms, which leads to extra problems. "Water durability" is a unique requirement shrimp feed producers face, that is how to maintain the integrity of pelletized feeds in an aquatic environment.

Magicoh Pellet Binder, a spray-dried urea-formaldehyde resin in powder form, provides a cost-efficient solution to your binding requirements, which improves the water resistance of your shrimp feed and finally improves your return on investment, and minimize pollution problems related to feed residue.

Ingredients

Polymethylolcarbamide

Benefits

- Improve water durability and stability of aquatic feed.
- Improve pellet durability of poultry and swine feed.
- Improve sensory properties of finished feed.
- Low inclusion so save more space for precious ingredients.
- Reduce dust and feed losses
- Reduce trucking and storage cost.

Indication

Used in aquatic feeds to improve its water durability and stability.

Used in poultry, swine and cattle feed to reduce dust and improve pellet durability (PDI).

Recommended Dosage

Add Magicoh® Pellet Binder directly into the feed mixer at the following recommended rate depending upon feed formulation and processing conditions, then follow the general pelleting and extrusion guidelines to produce quality pellet feeds.

Feed Type	Magicoh® inclusion (kg/ ton of feed)
Shrimp Feed	2.0 - 6.0
Fish Feed	2.0 - 4.0
Animal Feed	1.0 - 2.0

Storage

Stored in a ventilated and dry place. Avoid direct sunshine. Excessive heat and moisture may cause caking and lump.

Use up after the package is opened.

Packing

Packed in 20kg or 25kg bags.

Client's private label is acceptable.
