DiMee™ Cat Litter

Bentonite / Tofu / Bamboo fiber

HANGZHOU DE MARK INDUSTRIAL CO LTD

We are a global supplier of veterinary APIs and feed additives. Cat litter and pet food ingredients/additives businesses are organic extensions and expansions of our long-term development.

We have established three affiliated factories to produce cat litter products with minerals, tofu and bamboo fibre as the primary raw materials for the cat litter business. All cat litter products undergo strict quality control to ensure they are safe and harmless to both furry kids and their lovers.

Our products are available in multiple selections and can be customised to suit your and your furry child's preferences. From product formulation, production, packaging, shipping, and delivery to your designated places, we will devote our full efforts to working for you.

Cats and dogs are our family members, they want the same love and care we give to our beloved. They deserve the best and superior.

To become your reliable supplier, we remain working hard.

Pet Food Additives

VITAMINS

Product Name	Specification	Packing
Vitamin A	Vitamin A Acetate , 50000IU/g Ads.powder	25KG/DRUM
Vitamin D3	Cholecalciferol 500,000IU/g Ads. powder	20kg/CTN
VITADIS E	Vitamin E Acetate, 50% Ads. powder	25kg/CTN or bag
Vitamin K3	Menadione Sodium Bisulfate (MSB)	25 kg/CTN or drum
Vitamin B1	Thiamin HCL/Mononitrate	USP/BP/EP 25 kg/CTN or drum
Vitamin B2	Riboflavin 98%	USP/BP/EP 20 kg/CTN or drum
Vitamin B3	Nicotinic Acid	USP/BP/EP 25kg/DRUM
Vitamin B5	D-calcium Pantothenate	Feed grade 25kg/CTN or drum
Vitamin B6	Pyridoxine HCL	USP/BP/EP 25kg/Drum
Vitamin B12	Cyanocobalamin 1% by HPLC	25kg/CTN or drum
Vitamin C	L-Ascorbyl -2-Phosphate	feed grade 25kg/CTN
Vitamin H	Biotin 2%	20kg/CTN or bag
Folic Acid	Folic Acid USP/BP	feed grade 25kg/DRUM
Choline Chloride	Choline Chloride 60% corn cob powder	25kg/BAG

AMINO ACIDS

Product Name	Specification	Packing
L-Lysine HCL	98.5% feed grade	25kg/Bag
L-Threonine	98.5% feed grade	25kg/Bag
L-Tryptophan	98.5% feed grade	25kg/Bag
L-Arginine	99.0% food grade	25kg/drum
L-Leucine	98.5% Food grade	25kg/drum
L-Isoleucine	98.5% food grade	25kg/drum
Glycine	98.5% food grade	25kg/drum
L-Tyrosine	98.5% food grade	25kg/drum
L-Glutamine	98.5% food grade	25kg/drum
L-Valine	98.5% feed grade	25kg/Bag

Misc.

Product Name	Specification	Packing
Betaine HCL	93-98%	25kg/Bag
Taurine	99%	25kg/Bag
Fish Oil	DHA/EPA (Omega-3/6)	190kg/drum
Dried Egg	45% protein	20kg/Bag
Powdered egg yolk	30% protein	20kg/Bag
Powdered egg white	78% protein	20kg/Bag
Spirulina powder	60% protein	25kg/Bag
Soy Protein concentrate	69% protein	25kg/Bag

TECHNOLOGICAL AND SENSORY ADDITIVES

Product Name	Specification	Packing
Soy Lecithin	Oil & Powder	Emulsifier 25kg/CTN or drum
Beta-carotene	10% granule	Coloring agent 20kg/CTN
Marigold Extract	2% powder	Coloring agent 25kg/bag
Rosemary extract	10%-50%	Preservative 25kg/drum
Green Tea extract	95% polyphenol	Preservatives 25kg/drum
Yucca Schidigera extract	60% saponins	Odor controller 25KG/drum

Bamboo fiber

DM-03-101

Ingredients:

- Bamboo fiber, Guar, Cellulose,

Features

- Strong water absorption
- Odor control
- Biodegradable
- Toilet flushable

Charcoal Bamboo

DM-03-102

Ingredients:

- Bamboo fiber, Guar, Cellulose, Bamboo charcoal

Features

- Strong water absorption
- Natural deodorization
- Antibacterial
- Toilet flushable

Bamboo Mugwort

DM-03-103

Ingredients:

- Bamboo fiber, Guar, Cellulose, Chinese mugwort

Features

- Strong water absorption
- Odor control
- Antibacterial
- Toilet flushable

OEM/ODM

FLOW CHART

Raw Bamboo Cat Litter

Bentonite is a non-metallic mineral with montmorillonite as its main mineral component. It can expand into a paste after absorbing water, so it can completely simulate the convenience of cats in their natural state.

Our bentonite cat litter is produced of premium-quality clay ore deposited from volcanic ash as raw material, and applies dust removal and deodorization technology to make cat litter in spherical particles or irregularly shaped particles.

Bentonite cat litter has exceptional hygroscopicity, compact clumping, and natural footing, it is environmentally friendly and safe and easy to clean. It is the most economical cat litter category that offers good value for money.

Bentonite Cat Litter

Raw bamboo cat litter is produced by using bamboo fiber as the main ingredient, supplemented with other plant-based raw materials. The absorption, clumping and deodorizing properties of raw bamboo cat litter are excellent. All raw materials are natural. The pellets are beautifully shaped, hard-clumping, dust-free, and have built-in deodorizing properties.

Raw bamboo cat litter is toilet flushable, that is, waste cat litter can be disposed of directly into the toilet, which makes raw bamboo cat litter very convenient and easy to use.

Tofu DM-02-210

Ingredients:

- Pea fiber, corn flour, starch and deodorizing factor

Features

- Food grade ingredients
- Excellent clumping
- Toilet flushable
- Dust free

Tofu DM-02-212

Ingredients:

- Corn starch, bamboo fiber, pea fiber, calcium carbonate

Features

- Strong water absorption
- Natural ingredients
- Toilet flushable
- Dust free

Tofu & Bentonite Mixed

DM-02-221

Ingredients:

- Pea fiber, corn flour, starch, bentonite

Features

- Exceptional water absorption
- Easy clumping
- Toilet flushable
- Dust free

Bentonite DM-01-101

Ingredients:

- Bentonite(refined)

Features

- High water absorption
- Quick clumping
- Natural footing
- Dust free

Bentonite DM-01-102

Ingredients:

- Bentonite(deep mine&refined)

Features

- Mineral ingredients
- Natural footing
- Economical cost
- Dust free

Bentonite DM-01-111

Ingredients:

- Bentonite

Features

- Effective deodorization
- Quick clumping
- Natural footing
- Slight dust

Bentonite DM-01-121

Ingredients:

- Sodium Bentonite

Features

- High water absorption
- Quick clumping
- Economical cost
- Low dust

Bentonite DM-01-201

Ingredients:

- Bentonite
- Natural lavender powder

Features

- Mineral ingredients in coarse particle
- Quick clumping
- Natural footing
- Natural aroma scent

Bentonite DM-01-211

Ingredients:

- Bentonite
- Natural lavender powder

Features

- Natural footing in tiny particle
- Quick clumping
- Mineral ingredients
- Customized for kittens

Tofu cat litter is made of soybean fiber (commonly known as Tofu residue in China) as the main raw material. Tofu cat litter becomes popular for its water absorption, clumping, and deodorizing properties, and is also ideal for producing compound cat litter.

All the ingredients are of natural food grade, so there is no need to worry about cats accidentally eating them. The most crucial point is that tofu cat litter is soluble in water and biodegradable, the waste cat litter can be disposed of directly into the toilet and flushed away, so it is easy for cleaning and maintenance.
