HANGZHOU DE MARK INDUSTRIAL CO LTD
Hangzhou, China

Company Profile

Hangzhou De Mark Industrial Co Ltd, registered in 2017, is a company committed to the export trading and OEM manufacturing business on veterinary pharmaceutical raw materials (APIs), feed supplements and specialty additives. We provide a reliable and sustainable supply chain of products, solutions and services.

The founders have over 25 years of experience in the business and stable and well-established cooperation with top Chinese manufacturers who contribute to the assured quality supply.

Now we expand our business to include OEM formulation and manufacturing of medicated and nutritional premix in pellet, coated granule and solid solution forms for the livestock farming industry. These premixes processed by innovative technology have improved stability, palatability and efficiency.

De Mark operates with reference to the ISO quality system at every step of whole supply chain to ensure that product quality is not adversely affected from all aspects of production, sales, warehousing, in-land and export logistics. At the same time, we record and maintain data for each batch of products and each shipment in detail and completely to ensure traceability of historical data.

All products in our supply chain are manufactured as per the standard. Production facilities are regularly audited by third-party certification organization and issued with appropriate certificates, including but not limited to ISO 9000, ISO 22000, cGMP, FAMI-QS, HACCP, Halal and KOSHER.

We have rich experience in supplying mixed FCL, that is to combine different products into one container in our warehouse.

We keep a keen watch for new products and market trends. This enables us to respond quickly and pass on to our customers new products to serve each client's individual needs.

Adhering to the concept of "integrity, reliability, and professionalism", we seek to continue expanding our global presence by building up a strong network of overseas agents and creating added value by working closely with our partners.
