Introduction

When feeds are exposed to water, they can fall apart and deteriorate, leading to wasted costly ingredients and polluting pond bottoms, which creates additional problems. "Water stability" is a unique requirement that shrimp feed producers must address to maintain the integrity of pellet-sized feeds in an aquatic environment.

Magicoh® Pellet Binder, a spray-dried urea-formaldehyde resin in powder form, offers a cost-efficient solution to binding requirements. It enhances the water resistance of shrimp feed, ultimately improving return on investment and minimizing pollution issues related to feed residue.

Ingredients

Polymethylolcarbamide

Benefits

Enhancing feed quality is essential for optimal animal performance.

- ✓ Improves water stability of aquatic feed
- ✓ Enhances hardness of poultry and swine feed
- ✓ Increases feed integrity of finished products
- ✓ Low inclusion rates, saving space for valuable ingredients
- ✓ Reduces dust and feed losses
- ✓ Lowers trucking and storage costs

Indication

Magicoh® Pellet Binder is specifically recommended for aquatic pellet feed to enhance water durability. It is also effective in poultry, swine, and cattle feed, where it helps reduce dust and improve hardness.

Recommended Dosage

For best results, add Magicoh® Pellet Binder directly into the feed mixer before the pelletizing and extrusion processes, following the recommended dosage based on feed formulation and processing conditions.

Feed Type	Magicoh® inclusion (kg/ ton of feed)
Shrimp Feed	2.0 - 6.0
Fish Feed	2.0 - 4.0
Animal Feed	1.0 - 2.0

Storage

Stored in a ventilated and dry place. Avoid direct sunshine. Use up after the package is opened.

Packing

Packed in 20kg or 25kg bags. Client's private label is acceptable.
